

OUR WORK

We know exactly what it takes to build a startup

Since 2013, we've been at the beginning of tens of successful projects that are used by millions of people around the globe every single day. Startups are our passion, we love to work with them and we have more than enough experience to share.

A word from the founder

We founded Innovations in 2013 with the idea of creating a place to collaborate with smart and talented people who are not afraid of hard and challenging work. Because we knew that building a successful digital product or startup isn't easy. It requires extreme dedication, a lot of hard-to-learn know-how and, most importantly, a well-coordinated team of pros who can pull together.

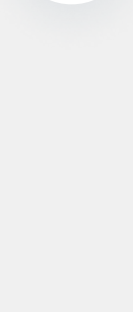

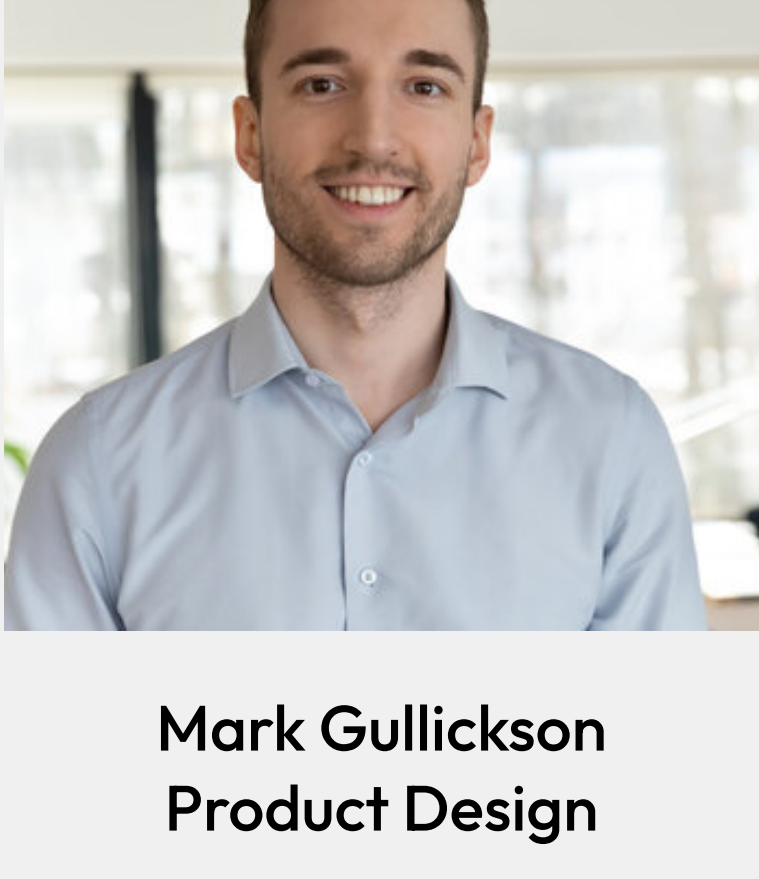

Our Guiding Principles

Reliability

Regular communication, availability, fairness, punctuality. What we promise, we deliver.

Our team
